

Natural Stones,
Stone
artifacts
at your door step

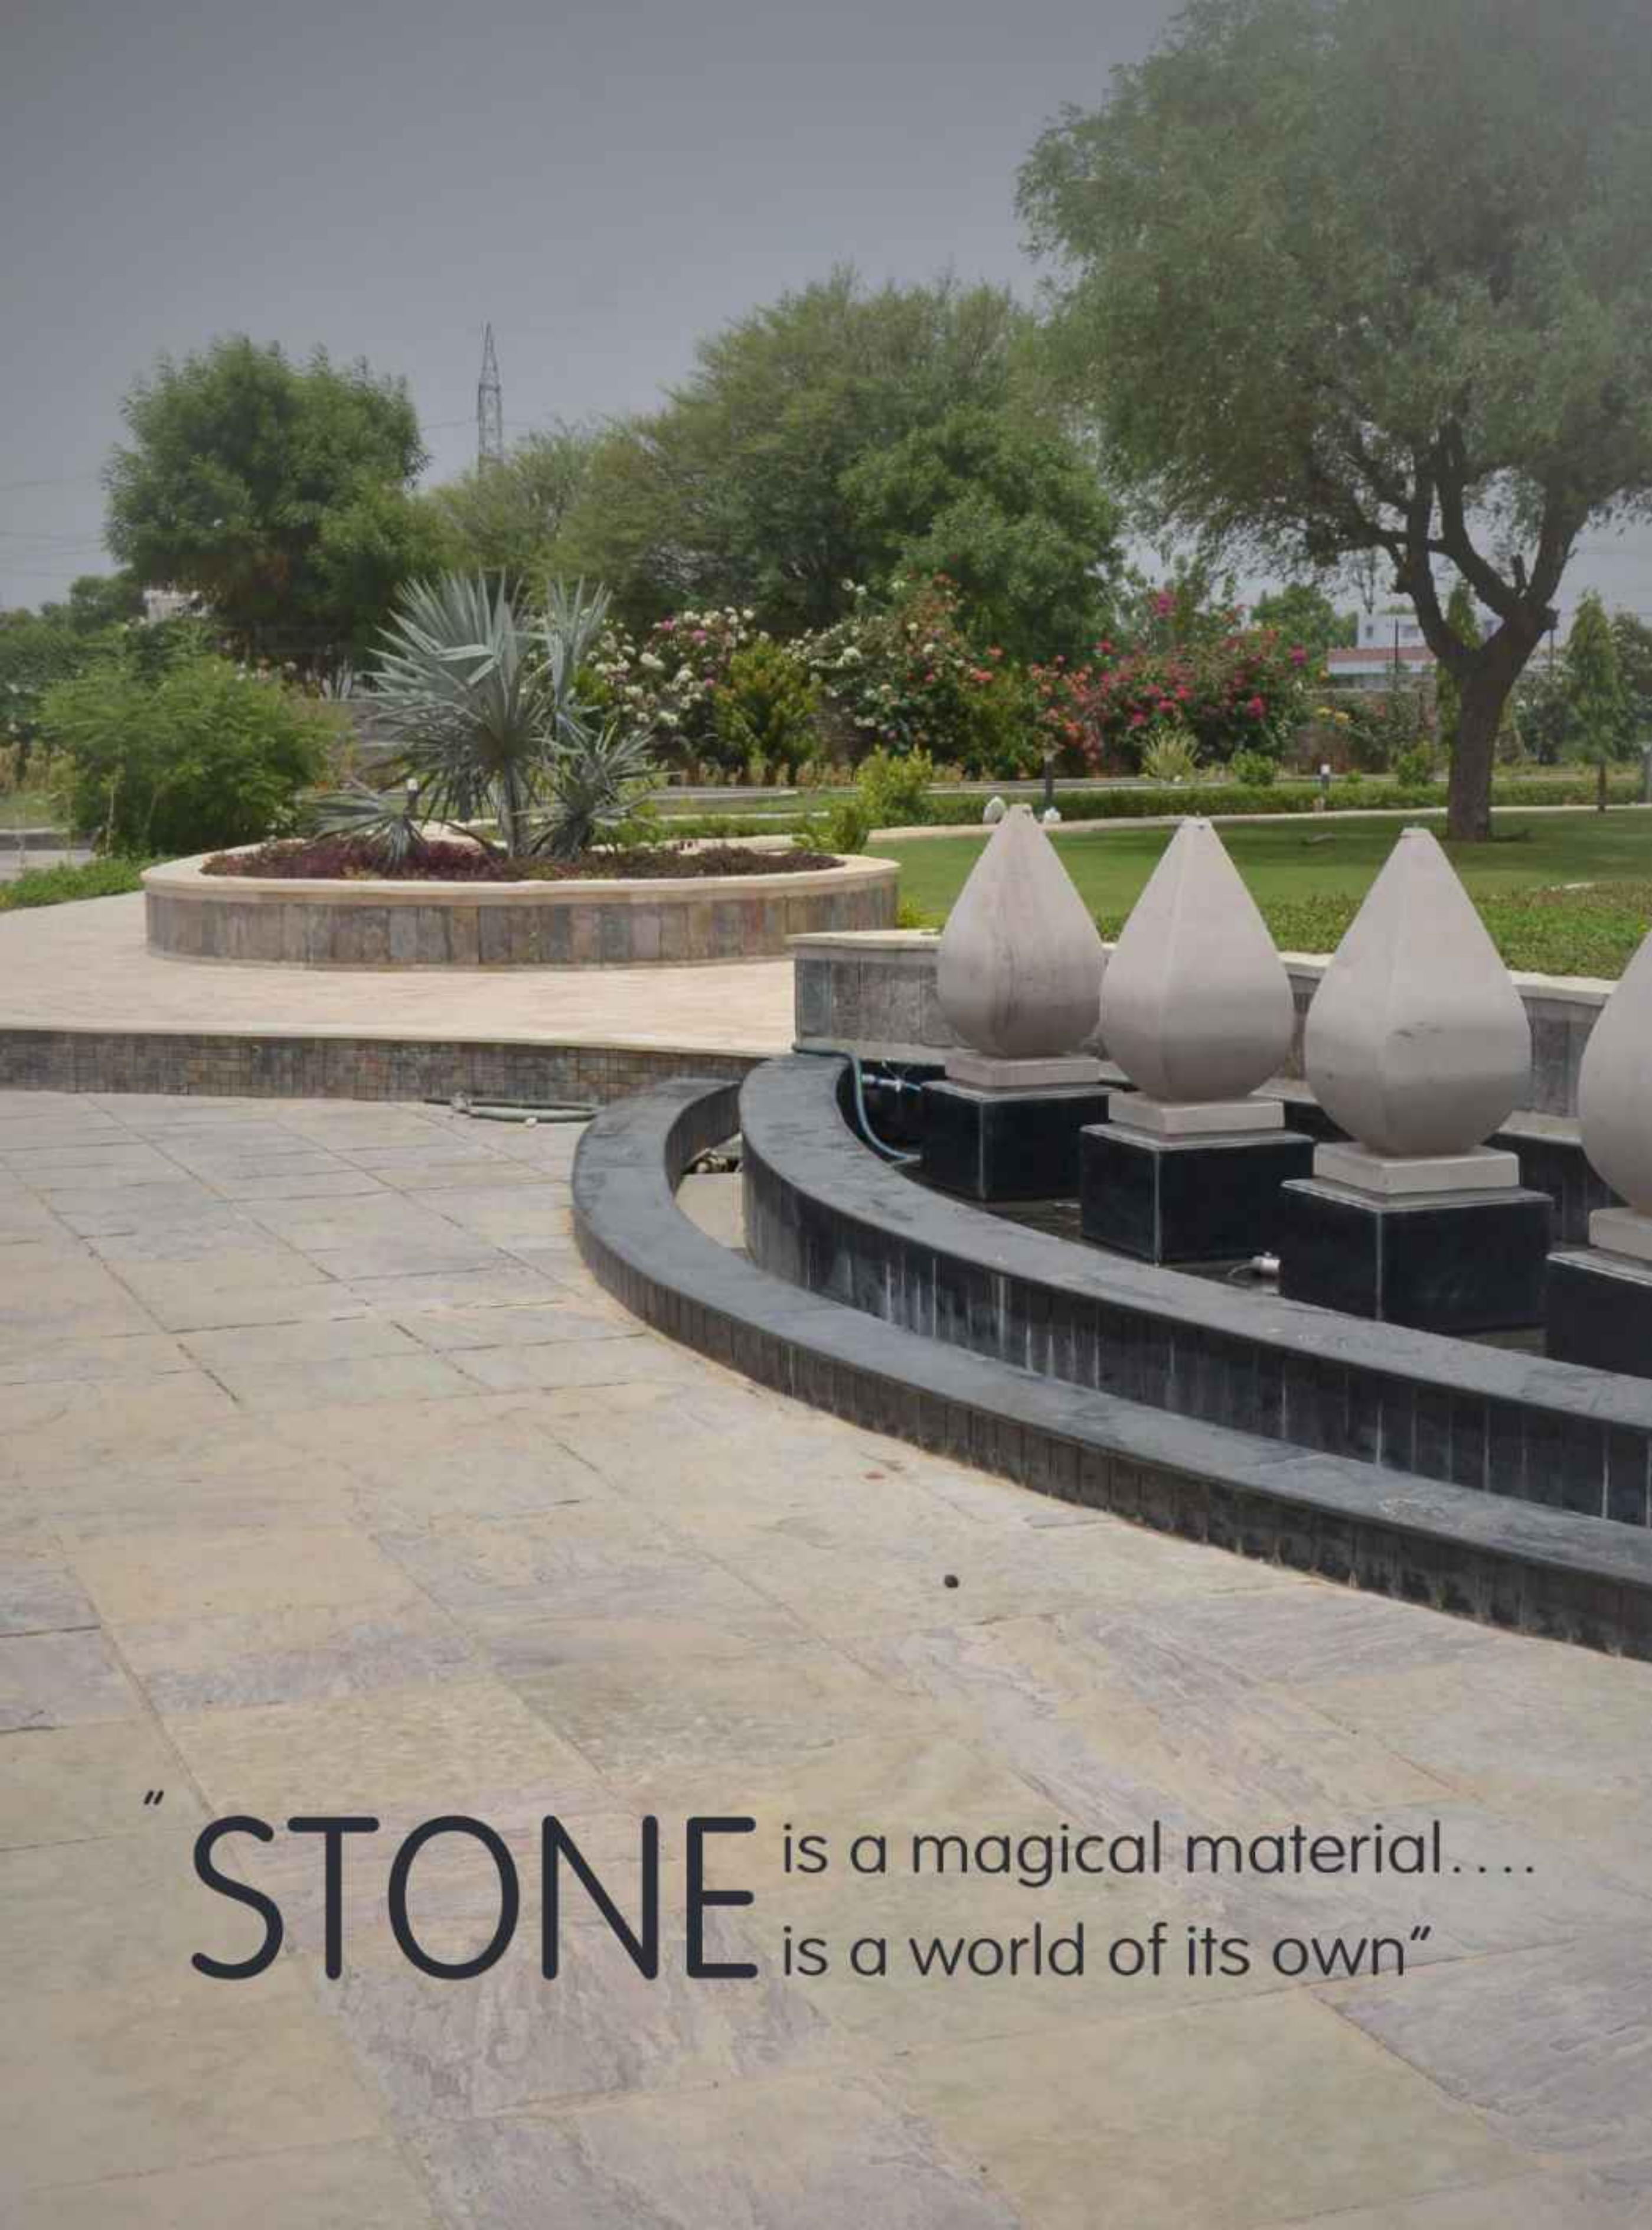

Stone has always been an integral part of human Civilization. The unique beauty and sophistication of the palaces, forts and mansions across the world is crowned with magnificent architectural stones. The tradition of stone architecture in the present era is gaining more significance than ever.

Each stone is a work of art produced by Mother Earth. Uniqueness of natural stone lies in its subtle variations of texture and colour. Use of stone offer permanence and elegance and it's virtually maintenance free.

Stones are classified as per their chemical composition like Limestones, Sandstones, Marbles, Granites etc. There are various value added surface and edge finishes which may leave consumer mystified. For the sake of simplicity we have classified our stones primarily on the basis of their colour and usability.

We bind quality, texture and splendour of natural stones to offer customized products as per your desires. We deal in Natural Stones, Architectural Stone structures and Stone application services.

"**STONE** is a magical material....
is a world of its own"
